Eriez® ProGrade Series Magnetic Separators Offer High Performance at a Low Price

Eriez Magnetics®, world authority in magnetic, vibratory and inspection applications introduces the company's new, economical **ProGrade™ series of Magnetic Separators**. Launched on March 1, 2007, the **ProGrade** line features standard magnetic plates, grates, traps and tubes.

ProGrade series professional grade magnets and assemblies are available at three different degrees of magnetic strength, enabling professionals in diverse industries to choose the ideal level of protection for their specific application.

"With the introduction of the ProGrade series, Eriez can now offer our customers a lower-priced line of standard products that meet the rigid quality standards they have come to expect from Eriez," says Charlie Ingram, Eriez' Vice President of Sales and Marketing.

"We understand that customers' needs vary greatly and solutions are not always universal," said Ingram. "That is why we have created three different ProGrade series levels: ProGrade Ceramic series, ProGrade Rare Earth series and ProGrade Xtreme™ series.

ProGrade Ceramic series, designed for general industry assemblies, targets the removal of medium to large ferrous contamination. These products offer basic protection from tramp metals damaging downstream equipment.

ProGrade Rare Earth series, ideal for improving purity in general industry and some food and chemical applications, targets small, fine, weakly magnetic ferrous contamination. Assemblies are designed with precise attention to welds and finish and feature stainless steel construction and high power magnets.

ProGrade Xtreme™ series, designed for food and pharmaceutical-grade assemblies, offers the ultimate in process purity, the finest materials and construction techniques and the industry's most powerful magnetic circuits.

To learn more about our wide range of cost effective **ProGrade products**, contact Eriez today!

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through eleven international facilities located on five continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send e-mail to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
